Transflective LCD Technology

New Transflective Technology Minimizes Power Consumption and Heat

The Utikor Transflective Toughpanel available in 6" and 10" models utilized a new Transflective LCD Technology, allowing the screen to be visible even under bright outdoor light conditions. The transflective LCD reflects back the UV component of sunlight.

6" TFT Color Transflective

10" TFT Color Transflective

Note: The specifications of the Utikor Transflective Touchpanels are identical to the standard Utikor except the Brightness is 500 nits but as stated earlier it's better than 1000 nits when compared to the standard LCD Technology
